

Iowa Mental Health and Disability Services Regions: Statewide Report SFY2020

Introduction

- Mental Health and Disability Services Redesign
 - Required Core Services - MHDS Regions are required to provide access to a core set of services to a target population of individuals with a mental illness or intellectual disability.
 - New Core Services – MHDS Regions are required to implement new services by July 1, 2021.
 - Statewide Standards - MHDS Regional Administration and core services are required to meet minimum statewide standards established in Iowa Administrative Code.
- Dashboard Measures – Uses MHDS Region data to measure:
 - Implementation and accessibility of core services to the target service population.
 - Implementation and accessibility of additional core services.
 - Extent of services provided to other populations such as children and individuals with developmental disabilities, brain injury, etc.
 - Utilization of MHDS Regional funded services.
 - Utilization of MHDS Regional funding.
- Limitations
 - As the composition of member counties reorganizes between regions, the ability to compare data annually per region will be difficult.
 - Most of the data is from the SFY2020 annual reports which were required to be submitted in December, 2020. Data related to accessibility, quality and implementation of core and additional core mental health and disability services is reported by the MHDS Regions more frequently. Those dates are noted in **red**.
 - MHDS Regions do not yet report all information consistently:
 - The number of people funded is not yet reported in a consistent manner.
 - The use of funds that are “block granted” to service agencies is not consistently reported.
 - Does not include data on Medicaid funded services. As more individuals move to Medicaid funded services, the service utilization data will reflect the decrease in region funded services with a decrease in persons served for certain programs.
- Conclusions
 - MHDS Regions have demonstrated the ability to develop networks of service delivery that meet, and in some instances, exceed requirements.
 - Nearly all MHDS Regions have developed the original required core services that meet the accessibility standards and are working to develop the new core services that meet accessibility standards by 7/1/2021.
 - MHDS Regions continued to expand the remaining additional core services such as jail diversion and other justice system involved services.
 - Regions have continued efforts to standardize methods for reporting individuals served. A contributing factor for the variance between regions and between SFY2019 and SFY2020 reflects the varying levels of progress amongst regions in implementing the standardized data collection plan.
 - Region-funded services were impacted statewide by the COVID-19 pandemic, most notably in vocational, supported community living and support services.
 - Regions have funded and continue to support the initial implementation of new core services (e.g., crisis services). Decrease in expenditures may reflect the shift to Medicaid-funded services as providers start to provide direct services.
 - Most MHDS Regional spending was on services for individuals with a mental illness.

SFY2020 Iowa Mental Health and Disability Services Regional Map

The fourteen (14) MHDS regions in place in SFY2020 are shown on the map below.

July 1, 2019

SFY2020 Regional Annual Submissions

Population

- Target Populations are defined as :
 - Adults (age 18 and above) with Mental Illness (MI) and/or Intellectual Disability (ID)
 - At or below 150% federal poverty level (FPL) – Some MHDS Regions extend eligibility to 200% of FPL
 - Not eligible for Medicaid or other third party insurance or the services are not covered by Medicaid or other third party insurance
- Populations referred to as “core plus populations” include children or adults with a brain injury (BI) or other developmental disability (DD).
- Data includes individuals funded where at least one day of service occurred in SFY2020.

Individuals Funded by Diagnosis and Age

- A total of 30,591 unduplicated individuals received Region funded services in SFY2020.
- Most of the individuals receiving Region funded services had a mental illness.
- Fewer individuals with ID received Region funded services because they are more likely to be eligible for Medicaid.
- About three percent of individuals have a dual diagnosis and are included in more than one category.
- Some Regions choose to fund children or adults with BI or DD.
- About 2,200 children received Region funded services.
- About 810 individuals with BI or DD received Region funded services.

Persons Served by Age, SFY2020

Historical Funding of Target Populations

- About 92 individuals with MI per 10,000 people in the general population received Region funded services in SFY2020.
- About 5 individuals with ID per 10,000 people in the general population received Region funded services in SFY2020.
- The number of individuals receiving Region funded services had been steadily declining since SFY2013 because:
 - The State assumed the responsibility to provide the non-federal share of Medicaid funding in SFY2013 that was previously the counties' responsibility; and
 - The State implemented the Iowa Health and Wellness Plan in SFY2014 providing expanded Medicaid eligibility for individuals receiving behavioral health services that were previously the Regions' responsibility.
- As regions continue to connect individuals with community-based Medicaid funded services while continuing to expand data collection efforts on persons served data, statewide trends have started to become more stable since SFY2018.
- Reasons for the difference between the number of individuals with MI and ID with services funded by the Regions includes:
 - More individuals with ID are eligible for Medicaid;
 - Greater array of services funded under Medicaid for individuals with ID; and
 - Individuals with MI may be eligible under the Iowa Health and Wellness Plan, but must have serious mental illness to be eligible for a greater array of Medicaid funded services.

**Statewide MI Population Served Per 10,000
SFY2013 - SFY2020**

**Statewide ID Population Served Per 10,000
SFY2013 - SFY2020**

- A standardized indicator was used to allow a comparison by year and region regardless of the size of the region. The measure is the number of individuals with MI and/or ID served by the region divided by the population of the region multiplied by ten thousand.

SFY2020 Funding of Target Populations by Region

- Reasons there is a variance between the number of individuals Regions fund services for:
 - The method used for counting the number of individuals receiving services in SFY2020 is not standardized statewide.
 - Regions' policies requiring individuals to first access Medicaid funding differs.
 - Demographics of Regions vary.

**MI Population Served Per 10,000 by Region,
SFY2019 vs SFY2020**

**ID Population Served Per 10,000 by Region,
SFY2019 vs SFY2020**

Revenues and Expenditures

Revenues

- According to the SFY2020 Regional Annual Reports, Regions received most of their funding from the following sources in SFY2020
 - \$78.4 M county property taxes; \$7.3 M from intergovernmental revenues; \$2.7 M from local miscellaneous revenue

Ending Fund Balance, SFY2018 to SFY2020

Region Funded Services by Diagnosis and Type of Service

- Expenditures spent on services include:
 - All expenditures spent on individuals funded by the regions
 - Services funded where at least one day of service was in SFY2020
 - Data does not include administrative costs
- Regions on services for all individuals whose services were funded by the regions.
 - \$84.8 M for individuals with MI;
 - \$4.5 M for individuals with ID;
 - \$4.8 M for individuals with other DD; and
 - \$311,000 for individuals with BI.
- Most services funded by Regions are not required.
 - **Core services** are the services Regions are required by Iowa Code to fund.
 - **Additional core services** are services identified in Iowa Code that Regions are to fund when public funds are made available for such services.
 - **Community living supports** are those services that Regions are not required to fund, but choose to fund for eligible residents of their region. Community living supports are critical to a person's well-being and life in the community.
 - **Community living supports also include the service coordination and mental health commitment costs Iowa Code mandates Regions to fund.**
- Regions spent the following on core, additional core and community living supports:
 - Core services are \$48.6 M.
 - Additional core services are \$9.2 M.
 - Community living supports are \$49 M.
- Regions spent \$84,860,407 on services for individuals with MI whose services were funded by the region:
 - Core services are \$42.4 M.
 - Additional core services are \$9 M.
 - Community living supports are \$33.5 M.
- The Regions spent \$4,506,750 on services for individuals with ID whose services were funded by the region:
 - Core services are \$2.3 M.
 - Additional core services are \$181,000.
 - Community living supports are \$2 M.
- The Regions spent \$5,100,492 on services for individuals with other DD and BI whose services were funded by the region:
 - Core services are \$3.9 M.
 - Additional core services are \$42,000.
 - Community living supports services are \$1.1 M.

- Total expenditures for services to individuals have decreased by 4% since SFY2019.
 - Expenditures for individuals with MI increased for core services by +\$1.1 M, increased for additional core services by +\$1.1 M and decreased for community living supports increased by -\$2.0 M.
 - Expenditures for individuals with ID decreased for core services by -\$2.2M, decreased for additional core services by -\$18,700 and decreased for community living supports by -\$1.9 M.
 - Overall, expenditures decreased for Community & Coordination Services by -4% (-\$604,000), Housing & Community Living Services by -4% (-\$1.5M) and Vocational & Day Services by -44% (-\$2.7M). Treatment Services increased by +1% (+\$577,900).

Statewide Expenditures by DG, SFY2019

Total = \$98,688,206

Statewide Expenditures by DG, SFY2020

Total = \$94,467,649

Expenditures by Service Type SFY2019 vs SFY2020

■ SFY2020 ■ SFY2019

Expenditures by Service Category SFY2019 vs SFY2020

■ SFY2020 ■ SFY2019

Total Expenditures for Regional Funded Services			
Services – All Diagnosis	Core Services	Additional Core Services	Community Living Supports
Community & Coordination Services	\$530,079	\$2,223,036	\$10,424,197
Housing & Community Living Services	\$17,927,070	\$ -	\$18,592,992

	TOTAL	\$2,309,622	\$180,986	\$2,016,142

Expenditures for Regional Funded Services for Individuals with Other DD and BI				
		Core Services	Additional Core Services	Community Living Supports
Community & Coordination Services		\$1,562	\$551	\$611,459
Housing & Community Living Services		\$3,046,795	\$ -	\$441,485
Treatment Services		\$32,323	\$40,979	\$3,911
Vocational & Day Services		\$853,985	\$ -	\$67,442
TOTAL		\$3,934,665	\$41,529	\$1,124,298
				

Administrative Costs by Region

- The data represent the percent of total expenditures that are attributed to administrative payments.
- The data exclude funds transferred between region and member county accounts.
- Statewide administrative expenditures increased +16% from \$10.6 M to \$12.3 M from SFY2019 to SFY2020.
- Variance between SFY2019 and SFY2020 in some regions are due to changes in how administrative costs are attributed for certain services (e.g., service coordination) and some regions' efforts in increasing staff capacity.

Cost per Person for Target Populations by Region

- Cost per person data include payments associated with an individual.
- There was a +2% increase in cost per person for individuals with MI and -27% decrease in cost per person for individuals with ID from SFY2019 to SFY2020.

Service Utilization

- The following charts show the number of individuals utilizing Region funded services per 10,000 in the general population of the Region. This standardized indicator allows a comparison region to region regardless of the population of the Region.
- Data includes individuals funded where at least one day of service was in SFY2020.
- Reasons there is a variance between the number of individuals Regions fund services include:
 - The method used for counting the number of individuals receiving services in SFY2020 was not reported in a standardized manner;
 - Regions' policies requiring individuals to first access Medicaid funding differs; and
 - Demographics of Regions vary.
- The higher utilization of outpatient mental health services decreases the utilization of inpatient mental health services
- Individuals living in smaller based settings and utilizing integrated services supports the principles of Olmstead.
 - Smaller living settings include the provision of services and supports to keep people in their own home. This includes but is not limited to long term rental assistance and supported housing.
- Reasons there is a variance between SFY2019 and SFY2020 in number of individuals reported in some Regions include:
 - Efforts made by those Regions to standardize reporting for individuals served; and
 - Significant efforts made by regions to expand core services, resulting in a higher number of persons served.
 - Targeted initiatives to move individuals from large group settings to smaller, integrated settings funded by Medicaid resulted in fewer individual reported served through region-funded services.
 - Initial start-up costs in implementing core services funded by the region are no longer an expenditure once programs start providing services.
 - The COVID-19 pandemic has decreased services statewide in some areas but have led to an increase in expansion of other services (e.g., decrease in vocational services, increase in community-based outpatient services).

Quarterly MHDS Region Report: SFY2021 Quarter 2

Accessibility

- Iowa Administrative Code sets access standards for core services and specifies either the maximum distance a person must travel or the maximum time a person can wait to receive services.
- The data are as of December 31, 2020 as reported by the Regional CEO based on services funded by the regions. Accessibility can change throughout the year.
- Nearly all core services are provided and meet accessibility standards for almost all MHDS Regions.
- Reasons for not meeting access standards include:
 - The availability of service providers throughout the region;
 - The interpretation of the standards by individual Regional CEOs. In collaboration with DHS, CEOs are working on a more uniform interpretation and reporting process for each of the access standards;
 - Movement of counties to a different region as of July 1, 2020;
 - General impact of COVID-19 to the availability of services.
- Regions report other factors effecting service delivery include need for intense services for individuals with challenging behaviors.

Core Services: Access Standards Region Status

Quality

- Iowa Code requires Regions to provide access to evidenced based practices (EBP).
- EBPs are practices that have consistent scientific evidence showing they improve individual outcomes.
- Iowa Administrative Code requires the Regions ensure that access is available to the seven (7) evidence based practices identified with (*) in the chart below as well as provide services that effectively treat individuals with Co-Occurring conditions and use Trauma-Informed Care practices. The chart also includes two additional core evidence based practices Regions are to provide if funding is available.
- This chart shows how many providers are implementing the required practices. At this time 4 of the evidenced based practices have at least one provider meeting independently verified fidelity standards.
- The data are as reported by Regional CEOs.

New Core Mental Health and Disability Services: Implementation and Access Standard Progress

- New core services are to be implemented on or before July 1, 2021.
- The data represents regions' progress in implementing the new core services as of **SFY2021 Quarter 2: December 31, 2020**.
- Data are self-reported by Regional CEOs. Charts reported by quarter for data available starting SFY2019.
- **Open** indicates the service is available to individuals in the Region.
- **In-Development** indicates the Region is developing the service with an anticipated start date.

Mobile Crisis Response

- On-site, face-to-face mental health crisis services for an individual experiencing a mental health crisis.
- The data reflects the number counties statewide and percent of counties per region that have mobile crisis response services available or in-development

Additional Core Mental Health and Disability Services Implementation

- Additional Core services are as of [SFY2021 Quarter 2: December 31, 2020](#).
- Data are self-report by Regional CEOs.
- **Open** indicates the service is available to individuals in the Region.
- **In-Development** indicates the Region is developing the service with an anticipated start date

Mental Health Services in Jail

- Outpatient mental health services provided to individuals in criminal justice settings.
- The data reflects the number counties statewide that mental health services in jail services are available or in-development.
- There were 95 open county jails in SFY2020

Jail Diversion Services

- Community-based treatment and support services to individuals with mental illness involved in the criminal justice system to eliminate unnecessary incarceration.
- The data reflects the number counties statewide and percent of counties per region that jail diversion services are available or in-development.

Percent of Counties within the Region with Jail Diversion Services by Region as of June 30, 2020

■ Open ■ In Development

Percent of Counties within the Region with Jail Diversion Services by Region as of December 31, 2020

■ Open ■ In Development

Civil Commitment Prescreening Evaluation

- Evaluations completed prior to commitment with the goal to divert the individual from the commitment process.
- The data reflects the number counties statewide that civil commitment prescreening evaluations are available or in-development.

Crisis Intervention Training

- Specific crisis intervention training for law enforcement
- The data reflects the number counties statewide that have trained officers or training in-development.

Crisis Prevention Training

- Training for law enforcement, first responders, etc. regarding mental health awareness other than CIT.
- All officers are required to receive crisis prevention training through the Law Enforcement Academy.

Appendix A – Regional Services Grid

Mental Health and Disability Services Regions fund services for residents who meet diagnostic and financial eligibility requirements. This grid provides the details of the Services by Diagnosis charts. All services can be designated into one of three categories:

- **Community Living Supports** are those services that Regions are not required to fund, but choose to fund for eligible residents of their region. Supports may not meet “medical necessity” criteria but are critical to a person’s well-being and life in a community. It also includes the service coordination and mental health commitment costs Iowa Code mandates Regions to fund.
- **Core Services** are the services regions are required by Iowa Code to fund; and
- **Additional Core Services** are services identified in Iowa Code that Regions are to fund when public funds are made available for such services.

The type of services can be identified as:

- Community and Coordination Services;
- Housing and Community Living Supports;
- Treatment Services; and
- Vocational and Day Services.
